

WHY SPAY AND NEUTER?

According to the ASPCA, annually in the US as of 2021 - 6.5 million animals enter US shelters and only 3.2 are adopted.

Reduces
Spraying & Marking

Reduces
Aggression

Increases
Lifespan

Decreases
Overpopulation

Reduces
**Risk of cancers &
other health issues**

Reduces
Roaming

Regardless of if litters are intentional or not, the result is homeless animals that have to be turned away from shelters or in worst-case scenario they could be euthanized because there simply isn't enough space to care for them all. Spay/neuter is the only permanent 100% effective method of birth control for animals and it saves countless animals from suffering.
